

The Case Intake Automation of Tomorrow at Your Fingertips Today

Drive >65% efficiency gains

in as short as 6-8 months by seamlessly layering proven, cutting-edge automation powered by Gen AI on top of your existing safety database.

Our new Advanced Intake offering is the industry's most advanced solution for automating the collection of safety data, revolutionizing the traditional approach to adverse event case intake.

Powered by our next-generation LifeSphere NavaX cognitive computing engine, Advanced Intake gives your teams seamless access to cutting-edge automation to streamline data collection from diverse sources.

Drive significant operational efficiencies and cost savings while improving compliance, quality, and patient safety and equipping your teams to transition into a more intelligently automated future.

Next-Generation Capabilities

Leverage a solution powered by our next-generation cognitive computing engine and the latest cutting-edge advancements in automation, including Gen AI and LLM's.

Proven Value

Achieve >65% increased intake efficiency with >90% data extraction accuracy using RPA and AI/ML that has been tested and proven through successful real-world cases.

Seamlessly Deployable

Deliver value sooner via pre-validated, production-ready automation that can be seamlessly integrated on top of your existing safety database in as soon as 6-8 months.

Advanced Intake

The future of safety intake automation has arrived. Drive transformative outcomes with Advanced Intake.

Unmatched Efficiency Gains

Automate routine workflows across case intake and triage, literature screening, and global submissions to maximize productivity and cost savings that can be reallocated to value-adding activities.

Enhanced Data Quality

Streamline the ingestion of structured and unstructured data from diverse data sources for greater data consistency with reduced risk of human errors, fatigue, and bias.

System-Agnostic

Leverage open architecture and integrations with third-party safety systems to seamlessly implement case intake automation on top of your existing safety database.

6-8 Month Deployment

Accelerate time-to-value through our expedited deployment process, including availability of pre-validated, production-ready automation to avoid extensive configuration and testing.

Trusted Automation Partner

As an industry leader in PV automation, we can show you where you will see value and map your automation journey to your unique workflows and strategic goals.

Catalyst for Digital Transformation

Bring your organization to the forefront of innovative practices to solve complex challenges and maintain competitive advantage in a dynamic and evolving landscape.

Ready to revolutionize traditional adverse event case intake by putting cutting-edge advancements in automation right at your fingertips? Advanced Intake can help.
