

MultiVigilance

The industry's most trusted safety system just got better.

Developed in partnership with the world's best life sciences companies, LifeSphere MultiVigilance is an end-to-end, automated safety system that helps hundreds of pharmacovigilance teams around the world save time and effort, ensure future-proof compliance and keep global teams aligned.

Save Time and Effort

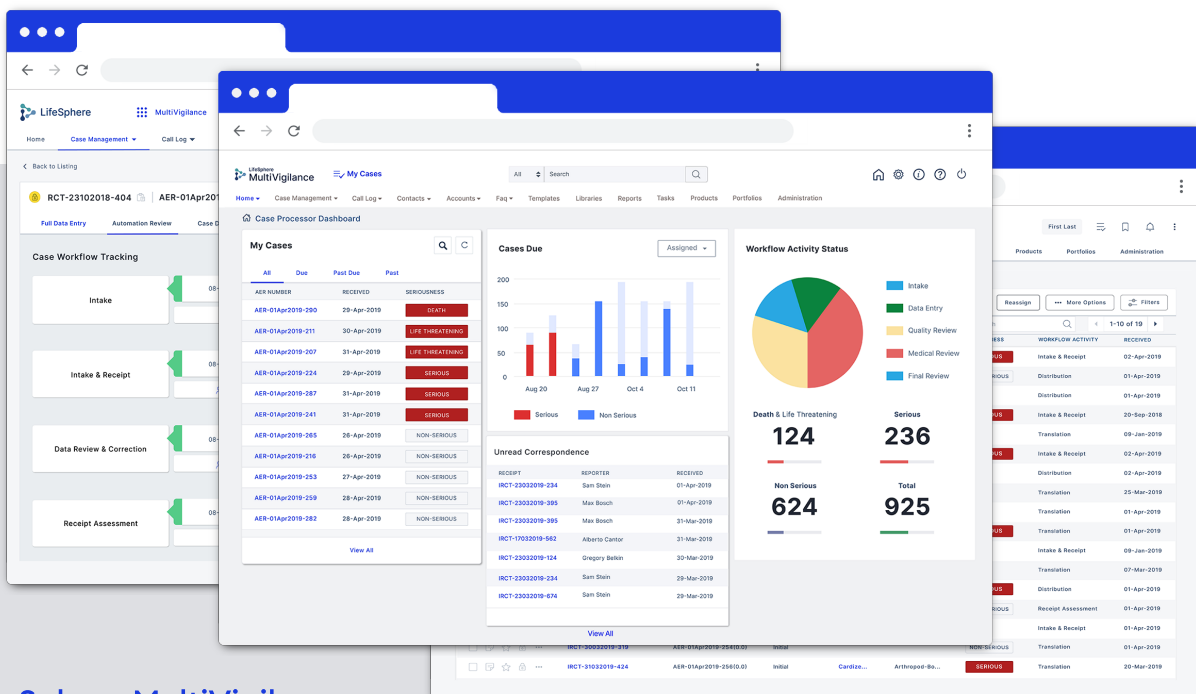

Give your PV team more time to focus on what matters most. LifeSphere MultiVigilance uses AI to automate repetitive tasks, enhance decision-making and bring game-changing efficiency to safety workflows.

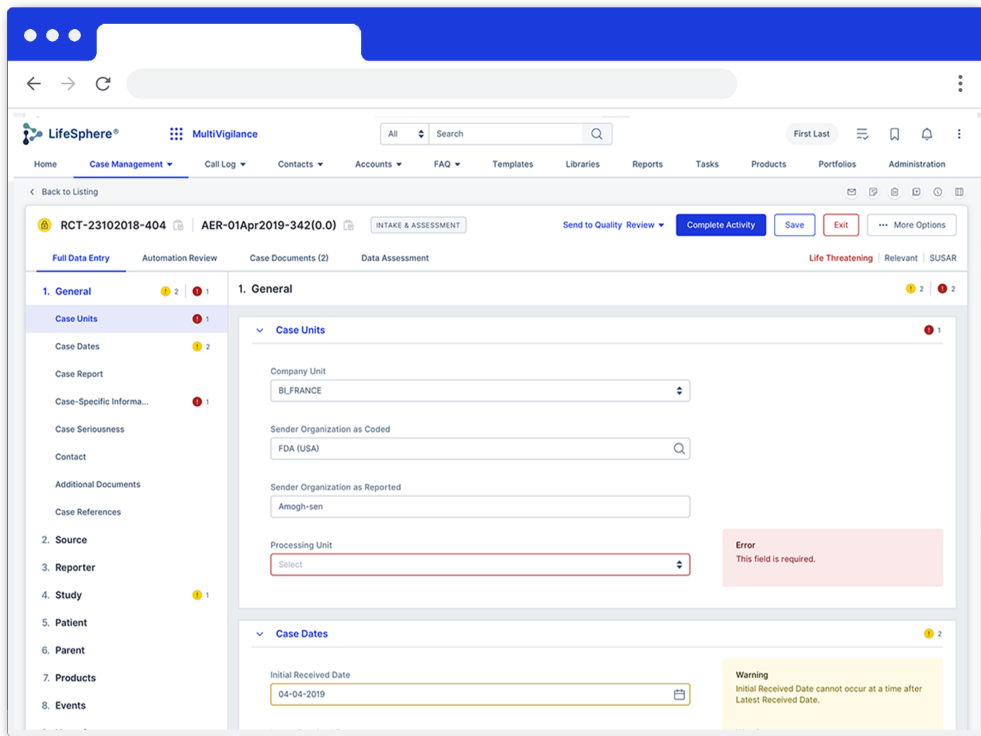

Future-Proof Compliance

Reduce risk and future-proof your PV environment with a scalable cloud solution that delivers continuous innovation and stays up to date with the latest regulatory requirements.

Align Global Teams

Keep global teams aligned with a single cloud database for HQ and affiliates that provides visibility into case management, with multi-language support and worldwide submission readiness.

FEATURES

Automated Duplicate Check

Quickly identify duplicate cases, thereby reducing manual effort and saving considerable time and cost.

Automated Validity & Triage

Supported by advanced automation features, case validity & triaging is carried out automatically, classifying incoming cases into initial, follow-up and duplicate cases.

Global Case Submissions

Supports case distribution via E2B R2 and R3 formats and complies with all global health authority submission requirements.

Automated Follow-Up

A revolutionary, automated process optimizes the identification of follow-up queries to reporter, tracking of queries, management of targeted questionnaires, and overall follow-up management.

Worry-Free Implementation

Fast, professional implementation teams adhere to industry best practices to get your teams up and running quickly.

Automated Coding

The coding of both drugs and event terms is automatically assessed using a company's product dictionary of choice as well as a company-specific list.

Touchless Case Processing

Certain types of cases can be processed without or with limited manual intervention, delivering significant cost and time savings.

Machine Translation

Automatically detects and translates non-English documents received before downstream processing for nearly all languages.

Smart Quality Check & Workflow Management

Users can view source data and source documents in a split-screen view to quickly compare and assess extracted versus reported information before passing the case to the next workflow step.

Easy Integration

Connects with existing systems via open architecture, leveraging API connectors and web services.

About ArisGlobal

ArisGlobal is the visionary technology company that's transforming the way today's most successful Life Sciences companies develop breakthroughs and bring new products to market. Our end-to-end life sciences platform, LifeSphere®, integrates our proprietary Nava® cognitive computing engine to automate all core drug development functions. Designed with a long-term perspective that spans more than 30 years, LifeSphere® boosts efficiency, ensures compliance, delivers actionable insights, and lowers total cost of ownership through multi-tenant architecture.

Headquartered in the United States, ArisGlobal has regional offices in Europe, India, Japan and China
