SAFETY

MultiVigilance
A Modern, Innovative Safety System

MultiVigilance powered by LifeSphere® NavaX™ is the industry's first and leading end-to-end automated touchless case processing system, built to help safety teams worldwide achieve scalable, efficient, and harmonized case management while improving patient safety and compliance.

Key Benefits

Significant Efficiency Gains

Accelerate case processing and reduce manual intervention via touchless case processing enabled by industry-leading automation in production today.

Comprehensive Compliance

Ensure consistent, top-quality compliance with the most robust, up-to-date support for global and regional regulations available.

Harmonized Global Operations

Establish a single global safety database with unified end-to-end workflows, secure cloud-based architecture, and open integrations.

Cost-Efficient Scalability

Make it simple to meet rising case volumes and grow as your business does with a cloud-based, multitenant platform powered by best-in-class automation.

ArisGlobal

Deliver real value with MultiVigilance.
